SUPPLEMENT TO
REPORT NO.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

2. Up to the present, the main source points for the electrical industry of the DDR have been in the West. As a result important construction work has been undertaken or will be undertaken to make the East Zone independent in this regard.
3. Bergmann-Borsig of Berlin-Wilhelmsruh is the most important of these installations. It is planned that Bergmann-Borsig become a complete power station, with turbine generators and steam generator installations. In 1950, five boilers with atmospheric pressures of 40 and 60 were built. In 1951, two boilers were built with 40 and 60 atmospheric pressures and three with 125 each.
4. SAG Wolf (Buckau) built four boilers with 60 and 125 atmospheric pressures in 1951. The capacity of this factory is now about 24 boilers with 60 and 100 atmospheric pressures each. This full capacity cannot be used because of a shortage of metal plates, drums, tubes, and other material.
5. EKM Halle'sche Pumpenwerke (Halle). Since the middle of 1951 this factory has been building high-pressure feed pumps.
6. EKM Turbinenfabrik Dresden. This factory has undertaken the production of steam turbines of the unit type up to 5,000 kw.
7. GÖrlitzer Maschinenbau (formerly WOMAG). The factory is now building steam turbines up to 15,000 kw.
